

Name: Grant Fossum (7th grade teacher)
School: Chestnut Log Middle School
Location: Douglasville, GA

Imagine if you will a school, a GREAT school, with some of the best students in the world. Are you still imagining? Imagine also a math teacher, who spent the first part of his career as an IT person and wanting to bring that experience and incorporate into the learning process for my students. The only barrier ... money of course. But AVemedia can change all that.

We current have a dry erase board, an overhead projector (good ol' Elmo, true story last year Elmo got mad at me, the bulb exploded and almost caught my room on fire ... isn't that reason enough for us to win?). I also have a computer hooked up to a TV via an AVerMedia AVerKey, here at CLMS we recognize quality companies (I can say more good stuff about your company if it helps out chances). We use these items all the time along with the CD player for math songs. We have great classes, but we want to excel beyond all known educational parameters. We can accomplish this with the AVerVision and LCD projector.

We are an America's Choice school that follows workshop format. The things we can do with this wonderful device are amazing and important. 3-D shapes, student work, games, interactivity is just the beginning of what could be accomplished.

We would gladly just take an AVerVision. This would allow children to take a more active role in the education process. Plus when I win Teacher of the Universe, (bound to happen soon), I guarantee to mention AVerMedia in my acceptance speech.

This classroom looks awful bare. It would be so much better with an AVerVision and LCD projector. Just a thought.
