Note:

Based on Intel's suggestion, for all Microsoft Windows XP OS, Hyper-Threading must be disabled in the system BIOS for our DVR products

For the most stable security DVR system, we strongly recommend NOT using VIA/SiS/ALI chipsets and SiS VGA chips with our products due to their severe limitation of the chipset design.

Please make sure you are using the standalone VGA card with 128 MB memory above instead of built-in onboard VGA card in order to ensure the working stability and performance of the NV/NXU series software.

We highly recommend against using Samsung Hard Disk Drives for SA, XR and EXR DVR products.
